COMMENTS:

I wish to raise a concern regarding the recent installation of advertising signage outside the Mammoth Self Storage building, within the Spencers Wood village. While I appreciate the importance of local business promotion and communication, the size of the signage

currently on display appears to be disproportionately large for the character and setting of our village area.

The signage not only detracts from the aesthetic appeal of the village, but also poses a potential distraction to motorists using what is already a busy and often congested road. I believe it is important that visual elements along this route remain appropriate and unobtrusive.
