COMMENTS:

Having backed onto this site for 30 years it's always been very quiet at night and only used Monday to Friday no light pollution from the buildings. I know fear that it will be noisy with truck reversing sirens 24 hours a day as it has mentioned this will be a shift working environment flood lights on at night. The pollution I expect when it's being demolished and the erection of buildings. Causing Dust on On our house windows, cars,patios etc. this building has not been used at full capacity for some time so to say that the traffic will not change is a false claim as this will be a distribution centre with large trucks delivering then many small vans coming and going like any Amazon type of business. On top of staff Conan's going. This is already a very busy stretch of road as it is and the building isn't even being used. When this building was first erected the traffic foot fall was a lot lower as there were not the houses that are now present. Not enough thought has gone into how large trucks exit this area as they will block an already busy road.
