COMMENTS:

Allowing an Islamic education, worship and community centre in Wokingham will be a great opportunity for the Muslim community to exercise like other faith within the borough their right to worship locally. This will give also our neighbours and wider community to learn more about Islam and the negative stereotypes surrounding this beautiful region that means Peace and love. Living in Wokingham and contributing like everyone to the economy and harmony of the city it will be unjustified for a community to always have to drive to a neighbouring Local Authority to worship and participate in charity activities to benefit that LA where everyone knows that charity begins at home. The whole Muslim community travelling to another boroughs will impact more the environment and traffic where having a local place of worship will reduce traffic as many will be able to walk or car share. Also more importantly the community leaders will help fight radicalisation and work closely with Wokingham and TVP to report any negative changes that are likely to affect our children and wider community. Let's work together to be that one Wokingham community.
