COMMENTS:

The proposed mosque is an integral part of ensuring the local community needs are met. A mosque is a place of worship, social gatherings, education and it will help the community to become more cohesive. This is by all means not an anti integration, but in fact having a united and a cohesive community will allow leadership within the community to ensure participation in the wider Wokingham community matters.

I also think the increased activity in the area will benefit the local shops there.

I do share the concerns about how the traffic can be mamaged but if the plans to also have an Aldi there, I don't see why can't a traffic light similar to the one for Sainsbury's can't be considered. Other than the traffic , which can be mitigated, I don't see any other potential risk or concern that will need a ddressing.
