COMMENTS:

RE Vary Condition 19 - on the communication sent to neighbours it states "Condition 19 refers to contamination" - is there a further definition about what this means? Contamination from the demolition that is to be achieved - assume the asbestos? Will there be more detailed communication to local residents about any potential risk and a definitive timeline when these works will occur as it is likely to be highly disruptive and noisy for us all? Will you be publishing a risk assessment RE: asbestos removal process; will residents need to keep windows and doors closed etc? Will you also be able to communicate on plans to ensure residents with parking 2-4A and other residents with parking to the rear of their properties will have full access during any demolition.
