COMMENTS:

No we certainly do not agree with this planning application. The road links will be linked to existing roads around the area which are already heavy congested. It needs new roads and a new entry and exit junction on to the M4. The roads cannot cope at the moment as it is ! If there is an accident, everything gridlocks. It is nice to see open green fields not mass development. We have certainly had our fair share of new builds in this area. Soon there won't be anymore green areas and the ones we have like California and Dinton Pastures you have to pay a heavy price to park there. How do young families manage, they can't always get on a bike! There should be free parking so all people can enjoy these areas. . How also will GP practices and hospitals cope. 3 weeks I had to wait for a GP appointment. They are at breaking point now!
