COMMENTS:

A mosque in workingham borough council is required as it is indispensable in our region for several reasons. Firstly, it functions as a spiritual hub where community members can convene for the five daily prayers and the weekly friday Jummah prayer, thereby fostering a sense of unity and shared faith. Secondly, a mosque serves as an educational institution, imparting Islamic knowledge to both children and adults through classes and study sessions. Furthermore, it acts as a central gathering place for social and community activities, including religious observances, charitable events, and counselling services, thereby promoting social cohesion and providing support within the community. In essence, a mosque is pivotal in maintaining and nurturing the spiritual and social well-being of our community.
