COMMENTS:

A lot of the issues raised about trafficking congestion seem to be excuses to generally just hide racial hatred. One said that there will be a lot of traffic due to apparently prayers being 6 to 8 times a day, which is just untrue. People are making untrue comments with no knowledge of the Islamic faith. Traffic in congestion is already an issue in most areas and the building of a community centre would not worsen this issue to such a degree that somehow the roads will be unusable. Even if there was a slight increase in traffic, a community centre is an integral part of any area, and frankly some people should attempt to understand and stop just thinking of their own personal interests.
