COMMENTS:

Firstly the situation regarding this area of land and environs has not changed since the previous application. So, I think object to this proposal. Reduction in the number of houses, reduction in size makes no difference to its current verballly effect to the area and existing residents. There is no public transport, the local surgeries and schools are at full capacity. Additionally Finchampstead has had more than enough new housing development in recent years/months, and the impact has been derable and detrimental -
