COMMENTS:

footings carried out a year ago to 3.0 m. we were not informed of further development
i have documented these events.i have pictures of deep trenches full to the top with water.
and as they have no fence between them and neighbours with many young children.

life hazard to drowning. condition of garden full of iron work and rubbish and despite heavy
diggers and machinery no protection was put in place for those children.no consideration
to us as neighbours was given and now they are going to box us in with no light or view.
we find 6.0.m to much i have lived in my house for forty years now again no consideration
for neighbours. mrs Jv Benfell
