

EnviroSmart

Phase 1 Contaminated Land Assessment

Site address

22a and 22b Barkham Ride
Finchampstead
Wokingham
RG40 4EU

Date issued

July 2026

Report status

Final

Grid Reference

478930, 165740

Site Area

0.12 ha

Report prepared for

A1 Roberts Properties Ltd

Report reference

83723R2

Risk – Low to Moderate/Low

Given the nature of the known land use activities at the Site and therefore the potential for some localised ground contamination to be present, it is recommended that a proportionate programme of site investigation works be undertaken in order to establish the presence or absence of contamination and to enable a quantitative assessment of the associated environmental risks.

In order to enable more representative soil sampling it is recommended that the site investigation be performed following the clearance of all existing Site structures and associated vehicles / miscellaneous wastes (including any bonfire residues).

Executive Summary

The purpose of this EnviroSmart report is to provide clear and pragmatic advice regarding the nature and potential significance of contaminated land hazards which may be present at the study site. GeoSmart are providing consultancy and professional opinion based upon our collation, interpretation and assessment of information contained within an Envirocheck report, and other sources where expressly stated (i.e. site visits, photographs, and anecdotal evidence). It is acknowledged that the risk assessment findings are based on documentary sources of information alone.

Site analysis

1. Probability/likelihood of a contaminant hazard at the Site	High likelihood	
	Likely	
	Low likelihood	
	Unlikely	
2. Potential severity/consequence of any impacts	Severe	
	Medium	
	Mild	
	Minor	
3. Overall land quality risks posed by the Site	Very high	
	High	
	Moderate	
	Moderate/low	
	Low	
	Very low	

Summary of existing and proposed development

The Site is currently used within a mixed use capacity as two dwellings with associated gardens and landscaping, as well as a yard used for general storage. Development proposals comprise the erection of two detached dwellings following the demolition of the existing properties, including the removal of the current storage yard. Both dwellings will have a private rear garden, bin and bicycle store and driveway.

Environmental Setting

British Geological Survey mapping indicates the absence of any superficial deposits beneath the Site. The bedrock geology consists of the Bagshot Formation which is classified as a Secondary (A) Aquifer.

The nearest water feature is the a drainage ditch, located c. 220 m north-east of the Site boundary.

There are no environmentally sensitive land uses within 500 m of the Site.

Site History

The Site was first developed during the 1990s within a residential capacity; the use of the Site for general storage was first observed in c. 2017. Off-Site land uses include farm buildings adjacent to the western Site boundary (1968 to present) and a plant nursery, c. 70 to 100 m east (1968 to 1989).

Radon

The Site lies in an area where <1% of homes are at or above the UK radon action level (200 Bq/m3).

Coal Mining

The Site does not lie within an identified coal mining area and is therefore unlikely to be affected by related ground stability or mine gas issues.

Summary of Conceptual Site Model (CSM)

Source of Contamination

- Potential for inorganic and organic contaminants to be present within the subsurface soils, associated with the Site's use as a storage yard (including scrap vehicle storage and a modest burning ground).
- Limited potential for asbestos containing materials within the subsurface soils, given the storage of possible construction / demolition materials on-Site.

Receptors

Human Health.

Human Health (pathway)

- Dermal contact, ingestion & inhalation of soils & soil dust.
- Consumption of home grown produce.
- Ingress into water supply pipework and subsequent water ingestion.
- Liberation of sub surface ACMs and inhalation of asbestos fibres.

Preliminary Risk Assessment

Overall, the preliminary risk classification of the Site in relation to the proposed redevelopment is considered to be Low to Moderate/Low.

Recommendations / Next Steps

Proportionate Phase 2 intrusive investigation following Site clearance

Given the nature of the known land use activities at the Site and therefore the potential for some localised ground contamination to be present, it is recommended that a proportionate programme of site investigation works be undertaken in order to establish the presence or absence of contamination and to enable a quantitative assessment of the associated environmental risks.

In order to enable more representative soil sampling it is recommended that the site investigation be performed following the clearance of all existing Site structures and associated vehicles / miscellaneous wastes (including any bonfire residues).

1. Introduction

1.1 Background

The study site (from herein known as 'the Site') is situated at 22a and 22b Barkham Ride in Finchampstead, Wokingham. A location plan of the Site is shown in Section 1.5. A proposed development plan of the Site is shown in Section 1.6.

GeoSmart was commissioned by A1 Roberts Properties Ltd in October 2024 to undertake a Phase 1 Land Quality Assessment for the Site. The report has been requested in order to support a proposed planning application for the Site.

The report was updated to reflect new development proposals in July 2026. Note: the Landmark dataset is based on the original red line boundary, which was reduced in scale as part of the updated plans.

The proposed development is for the erection of two detached dwellings following the demolition of the existing properties, including the removal of the current storage yard. Both dwellings will have a private rear garden, bin and bicycle store and driveway.

The EnviroSmart report has been undertaken by firstly compiling information concerning the Site and the surrounding area, including current and historical land uses, geological records and registered pollution incidents. The information which is gathered is then used to construct a 'conceptual site model', including an understanding of likely contaminant sources, pathways and receptors. Finally, a preliminary assessment of risks posed to identified receptors (i.e., people, buildings or the natural environment) from the anticipated land quality at the Site is performed. The risk assessment methodology is consistent with CIRIA C552 (2001); see Section 3.4 for details.

1.2 Purpose of this report

The purpose of this EnviroSmart report is to provide clear and pragmatic advice regarding the nature and potential significance of contamination hazards which may be present at the Site.

1.3 Report contents

This report is divided into two sections, as described below:

Section	Content	Purpose
Section 2: LAND QUALITY ASSESSMENT	A summary of the site history and environmental setting, the findings of the preliminary risk assessment and associated recommendations	To present a clear and concise overview of the land quality issues facing the Site, including recommendations of how to manage any land contamination which may be present
Section 3: SUPPORTING INFORMATION	A collection of site specific information on which the land quality assessment is based	To provide detailed information in support of the risk assessment; this section also represents a source of reference data for use in any subsequent site works/assessments

1.4 Report limitations

It is noted that the findings presented in this report are largely based on information supplied by third parties. Whilst we assume that all information is representative of past and present conditions we can offer no guarantee as to its validity.

This report excludes consideration of potential hazards arising from any activities at the Site other than normal use and occupancy for the intended land uses. Hazards associated with any other activities have not been assessed and must be subject to a specific risk assessment by the parties responsible for those activities.

1.5 Site location and topography

1.6 Proposed Site development plan

2. Land quality assessment

2.1 Site details

Site name:	22a and 22b Barkham Ride	Current land cover:	Majority softstanding (c. 85%) with some hardstanding/building cover (c. 15%)
Current use:	Residential dwellings with associated storage yard		
Proposed use:	Residential with garden	Site area:	0.12 ha

2.2 Conceptual understanding (potential sources of contamination)

 Site history <i>(historical land use taken within 250m radius of the Site boundary)</i>	Date	Description of land use		POTENTIAL SOURCES OF CONTAMINATION	Source description	LOW LIKELI-HOOD	PROBABILITY OF CONTAMINATION
		On-Site	Off-Site				
	1871 (mapping)	The Site comprises undeveloped land (assumed agricultural use).	The area surrounding the Site generally comprises undeveloped agricultural land and woodland. A highway runs adjacent to the northern Site boundary. A drainage ditch is c. 30 m north-east.				
	1876 (mapping)	No change.	No change.				
	1899-1900 (mapping)	The Site is mapped as comprising of woodland.	Minor changes to the distribution of woodland have been recorded within the vicinity of the Site.				
	1911-1912 (mapping)	No change.	No change.				
	1932-1933 (mapping)	A driveway crosses the north-east corner of the Site.	Buildings (with an unknown usage - likely residential / agricultural) are present c. 20 m west, c. 35 m east and c. 65 m west of the Site.				
	1938 (mapping)	No change.	No change.		Continued overleaf		

2.2 Conceptual understanding (potential sources of contamination)

 Site history (historical land use taken within 250m radius of the Site boundary)	Date	Description of land use		POTENTIAL SOURCES OF CONTAMINATION	Source description	LOW LIKELI-HOOD	PROBABILITY OF CONTAMINATION
		On-Site	Off-Site				
	1948 (aerial imagery)	The Site comprises undeveloped land; no other features can be discerned from the available imagery.	The area surrounding the Site generally comprises agricultural land, with development (most likely residential) along Barkham Ride.		The land use history suggests that there is the potential for contamination to have occurred <u>on-Site</u> relating to the following: Residential - Miscellaneous small-scale fuel or chemical spills relating to domestic land-uses (i.e. fuels used for garden machinery, herbicides, paints/creosote, detergents, etc.). - Potential for localised/historical deposition of residential waste materials (ash, litter, packaging, etc). The land use history suggests that there is the potential for contamination to have occurred <u>off-Site</u> relating to the following: Plant nursery / farm buildings - Bulk storage of fuels and/or miscellaneous chemicals. - Miscellaneous small scale fuel and chemical spills (i.e., fuels used for heating/agricultural machinery/other vehicles, oils and lubricants, herbicides/pesticides, fertilisers, paints/thinners, creosote, etc.). - Potential for localised/historical deposition of domestic/agricultural waste materials. - Localised disposal of effluent wastes. Poultry houses - Potential for bulk storage of fuels and/or miscellaneous chemicals. - Miscellaneous fuel and chemical spills (i.e., fuels used for heating & powering machinery/vehicles, oils and lubricants, paints/thinners, degreasers, animal products etc.). - Pathogens associated with animal products. <i>Note: given the appreciable distance between the Site and the poultry houses a relevant contaminant linkage is considered to be very unlikely.</i>		
	1961 (mapping)	No change.	No change.				
	1968 (mapping)		An outbuilding is located adjacent to the western Site boundary, potentially associated with a nearby farm (Rook's Nest). A plant nursery is c. 70 m east, whilst poultry houses are c. 230 m north-east. Further development (generally within a residential capacity) is recorded from c. 150 m to the east of the Site.				
	1971 (mapping)		The plant nursery is now recorded c. 100 m north-east of the Site at its closest point.				
	1977-1979 (mapping)		The poultry houses c. 230 m north-east are marked as disused.				
	1981 (mapping)	The Site is not discernible on the available mapping.	The disused poultry houses c. 230 m north-east are no longer present.				
	1983 (mapping)		No change.				
	1987-1988 (mapping)	No change.					
	1989-1990 (mapping)		The nursery c. 100 m north-east is no longer recorded.				
	1993 (mapping)		No change.				

2.2 Conceptual understanding (potential sources of contamination)

 Site history (historical land use taken within 250m radius of the Site boundary)	Date	Description of land use		POTENTIAL SOURCES OF CONTAMINATION	Source description	LOW LIKELI-HOOD	PROBABILITY OF CONTAMINATION
		On-Site	Off-Site				
	1999 (mapping)	A building is present in the central-eastern part of the Site, in the same configuration as at present.	No change. The aerial imagery confirms the presence of agricultural buildings c. 20 m to 30 m west/ south-west of the Site.		As above		
	1999-2010 (mapping & aerial imagery)	No change.	No change.				
	2013 (aerial imagery)	A possible shed is present in the rear garden.					
	2014-2016 (mapping & aerial imagery)	No change.					
	2017 (aerial imagery)	The possible shed is no longer present in the rear garden. Storage of materials and a possible caravan are recorded on the front driveway.	Further storage of materials / vehicles is recorded c. 5 m south of the southern Site boundary.				
	2018 (aerial imagery)	Materials are no longer present on the front driveway.	No change.				
	2020 (aerial imagery)	Storage of materials is recorded in the rear garden, to the north and west of the Site.					
	2021 (aerial imagery)	Vehicles are observable to the south-west of the on-Site building.					
	2022 (aerial imagery)	No change.					
	2023 (aerial imagery)	The observed materials appear to include household / general wastes and items in heaps in the south and north-east of the Site.					
	2024 (mapping)	No change.	The drain c. 30 m north-east is no longer present.				
2025 (aerial imagery)	No change.						

2.2 Conceptual understanding (potential sources of contamination)

 Current land use	The Site is currently used within a mixed use capacity as two dwellings with associated gardens and landscaping, as well as a yard used for general storage. There are no known buried storage tanks at the Site. There is no known bulk fuel or chemical storage on Site. Photographs of the Site indicate that it is used for the storage of various materials, including household materials and electrical equipment. Several scrap vehicles are also present at the Site (see Section 3.2).	POTENTIAL SOURCES OF CONTAMINATION	Given the Site's current use, there is potential for localised contamination relating to the following: - Potential for small-scale storage of fuels and/or miscellaneous chemicals. - Miscellaneous small scale fuel and oil spills / leaks relating to the presence of assorted vehicles on-Site. - Potential for localised deposition of construction / general waste materials on-Site. - Potential for asbestos containing materials (ACM) to have been deposited within any construction / demolition materials stored on-Site. - Possible ACM debris resulting from current Site structures. - Localised burning / bonfires may have resulted in the presence of poly-aromatic hydrocarbons and other combustion by-products (see Photograph 11 in Section 3.2).	LOW LIKELIHOOD	PROBABILITY OF CONTAMINATION
--	--	---	--	---------------------------	---

2.2 Conceptual understanding (potential sources of contamination)

 Neighbouring industrial land uses (see environmental data report in Section 3.3 for full listing)	The following potentially contaminative land uses are located within 250 m of the Site:			POTENTIAL SOURCES OF CONTAMINATION	Despite the presence of potential contaminative activities in the area surrounding the Site, since none occur within close proximity (i.e., within a 50 m radius of the Site) they are unlikely to pose a significant contamination hazard in relation to the Site itself. Contemporary trade directory entries include: - Mike Robinson (French polishing), c. 140 m north-west - active - Lifestyle Systems Ltd (automation systems and equipment), c. 165 m north-west - inactive Points of interest (manufacturing and production) include: - D C Farmer (livestock farming), c. 150 m north-west	UNLIKELY	PROBABILITY OF CONTAMINATION
	Distance from Site	Number of active industrial land uses	Number of inactive industrial land uses				
	1 - 50 m	0	0				
	51 - 100m	0	0				
	101 - 250 m	1	1				
	Nr	Nearest distance	Land use / permitted activity / authorisation				
	0	NA	Fuel station entries				
	0	NA	Gas pipelines				
	0	NA	Underground electrical cables				
	0	NA	Control of major accident hazards sites (COMAH)				
	0	NA	Notification of installations handling hazardous substances (NIHHS)				
	0	NA	Explosives sites				
	0	NA	Planning hazardous substance consents				
	0	NA	Planning hazardous substance enforcements				
	0	NA	Sites determined as Contaminated Land under Part IIA of the Environmental Protection Act 1990				

2.2 Conceptual understanding (potential sources of contamination)

 EA recorded pollution incidents <i>(see environmental data report in Section 3.3 for full listing)</i>	No Environment Agency pollution incidents have been recorded within 250 m of the Site.	POTENTIAL SOURCES OF CONTAMINATION	No potential for gross contamination has been identified in relation to any pollution incidents occurring near to the Site.	NEGLIGIBLE	PROBABILITY OF CONTAMINATION
 Landfills / waste sites <i>(taken within 500m radius of the Site boundary, see environmental data report in Section 3.3 for full listing)</i>	There are no BGS recorded landfills located within 500 m of the Site. There are no Environment Agency listed historical landfills located within 500 m of the Site. There are no registered landfills located within 500 m of the Site. There are no Local Authority listed historical landfills located within 500 m of the Site. The following other waste sites are registered within 500 m of the Site: 0 Records of registered waste transfer sites. 0 Records of registered waste treatment or disposal sites. 0 Records of licenced waste management facilities.		Given the absence of any historical or operational landfills within close proximity of the Site no associated contamination hazards have been identified. Given the absence of any waste treatment, transfer or disposal sites within close proximity of the Site no associated contamination hazards have been identified.	NEGLIGIBLE	

2.2 Conceptual understanding (potential sources of contamination)

Rn Radon <i>(see environmental data report in Section 3.3 for full listing)</i>	According to current UK radon mapping the Site lies in an area where <1% of homes are at or above the UK radon action level (200 Bq/m3).	POTENTIAL SOURCES OF CONTAMINATION	<1% of homes are at or above the UK radon action level (200 Bq/m3).	UNLIKELY	PROBABILITY OF CONTAMINATION
---	--	------------------------------------	---	----------	------------------------------

2.3 Conceptual understanding (environmental sensitivity / potential severity of impacts)

 Geology and Groundwater <i>(see the environmental data report in Section 3.3 for full details)</i>	British Geological Survey mapping indicates the absence of any superficial deposits beneath the Site. British Geological Survey mapping indicates that the bedrock geology consists of the Bagshot Formation (BGS) which comprises of sand and is classified as a Secondary (A) Aquifer. According to the GeoSmart Groundwater Flood Risk (GW5) Map (GeoSmart, 2026), the risk of groundwater flooding at the Site is 'negligible to low'. The Site does not lie within a groundwater Source Protection Zone (SPZ). The following groundwater abstraction licences are held within 1 km of the Site: D Seal general agricultural abstraction, c. 335 m north-west.	POTENTIAL RECEPTORS	A Secondary (A) Aquifer comprises permeable layers capable of supporting water supply at a local rather than strategic scale, and in some cases forming an important source of base flow to rivers. Based on the susceptibility of the Site to groundwater flooding, a groundwater flood risk assessment is not considered necessary for the Site. The depth to groundwater beneath the Site is unknown. The presence of one or more groundwater abstraction licences within close proximity of the Site indicates a reasonable groundwater resource potential.	MEDIUM	POTENTIAL SEVERITY OF IMPACT
--	--	----------------------------	---	---------------	-------------------------------------

Superficial Geology (BGS, 2026)

Bedrock Geology (BGS, 2026)

2.3 Conceptual understanding (environmental sensitivity / potential severity of impacts)

 Geohazards <i>(see the environmental data report in Section 3.3 for full details)</i>	The Site does not lie within a 'Coal Mining Reporting Area'. There are no brine affected areas within 75 m of the Site. No or limited artificial ground / Made Ground is anticipated on Site. There are no natural hazards (with a hazard rating of moderate or above) at or within 50 m of the Site.	POTENTIAL RECEPTORS	The Site does not lie within an identified coal mining area and is therefore unlikely to be affected by related ground stability or mine gas issues. The Site does not lie within an area of former brine working and is therefore unlikely to be affected by related ground stability issues. BGS GeoIndex Onshore mapping does not have any artificial deposits recorded at the Site, and no previous demolition works are known to have occurred.	MILD	POTENTIAL SEVERITY OF IMPACT
---	---	----------------------------	---	-------------	-------------------------------------

2.3 Conceptual understanding (environmental sensitivity / potential severity of impacts)

 Surface water <i>(see the environmental data report in Section 3.3 for full details)</i>	The nearest water feature is a drainage ditch, located c. 220 m north-east of the Site boundary. The Site lies within a Flood Zone 1 (low probability). There are no surface water abstraction licences within 1 km of the Site.	POTENTIAL RECEPTORS	Given the distance from the Site and the nature of the local geology, the sensitivity of local surface waters is judged to be low.	MILD	POTENTIAL SEVERITY OF IMPACT
 Environmental designations <i>(see the environmental data report in Section 3.3 for full details)</i>	There are no environmentally sensitive land uses within 500 m of the Site.		No relevant environmentally designated sites/receptors have been identified.	NEGLIGIBLE	
 Human receptors	Proposed residents/users of the Site plus neighbouring residences.		Human receptors are proposed to be present on Site.	SEVERE	

2.4 Regulator perspective

Consultation date	26th November 2024	Wokingham Borough Council
GeoSmart consultant	Annabel Elleray	Chris Christofis
Consultation outcome	The local authority replied to a consultation request by GeoSmart and stated: <i>"Map 1 [below] shows the site on our GIS mapping, the green area to the north is flagged as a former nursery, present on historical map 1960 and represents a low risk to your site, we have no other flags for the site, recently the site has seen some waste deposits that I am aware of, no specifics of any hazardous material, described as builders waste. We have not investigated the site under part 2A of the EPA 1990 at this time, we have no future plans to do so. I would likely ask for a standard site investigation, if major development were proposed."</i> ArcGIS Web Map  26/11/2024, 16:11:26 Environmental Health © Crown copyright and database rights 2024 GB AC000046972	

2.5 Preliminary Risk Assessment

Nr	Sources	Pathways	TYPE	Receptors	Consequence	Probability	Risk classification	Comments
On-Site sources								
1	Potential for inorganic and low volatility organic contaminants to be present within the subsurface soils	Dermal contact, ingestion & inhalation of soils & soil dust	HH	Future Site occupants	MEDIUM	LOW LIKELIHOOD	MODERATE/LOW RISK	Given the use of the Site for general storage (including assorted waste materials / items) and also the presence of scrap vehicles and bonfire residues (see Section 3.2), there is potential for some localised inorganic and low volatility contamination to be present, which could affect future Site occupants, most notably within the proposed landscaped areas.
2		Consumption of home grown produce	HH		MEDIUM	LOW LIKELIHOOD	MODERATE/LOW RISK	
3		Ingress into water supply pipework and subsequent water ingestion	HH		MEDIUM	LOW LIKELIHOOD	MODERATE/LOW RISK	
4		Building materials in direct contact with aggressive ground	PROP	Future Site buildings	MILD	UNLIKELY	VERY LOW RISK	Aggressive ground conditions are not anticipated to be present.
5		Dissolution into pore water/shallow groundwater and subsequent migration	CW	Bagshot Formation (a Secondary (A) Aquifer)	MEDIUM	UNLIKELY	LOW RISK	Whilst the potential presence of some localised inorganic and low volatility contamination at the Site could potentially impact the groundwater quality in the underlying bedrock aquifer, given the nature and scale of the known land use activities, an appreciable source of soluble contamination is considered to be unlikely. It is noted that there are no potable water abstractions or SPZs within the local area.
6		Dissolution into pore water/shallow groundwater and subsequent lateral migration	CW	Drainage ditch (c. 220 m north-east)	MILD	UNLIKELY	VERY LOW RISK	The risk classifications reflect the reasonable distance to the nearest surface water feature, as well as its anticipated modest sensitivity.
7		Dissolution into aqueous phase and preferential migration via drainage structures	CW		MILD	UNLIKELY	VERY LOW RISK	

2.5 Preliminary Risk Assessment

Nr	Sources	Pathways	TYPE	Receptors	Consequence	Probability	Risk classification	Comments
8	Potential for volatile organic contaminants to be present within the subsurface soils	Dermal contact, ingestion & inhalation of soils & soil dust	HH	Future Site occupants	MEDIUM	LOW LIKELIHOOD	MODERATE/LOW RISK	Given the use of the Site for general storage (including assorted waste materials / items) and also the presence of scrap vehicles (see Section 3.2), there is potential for some localised organic contamination to be present, which could affect future Site occupants, most notably within the proposed landscaped areas.
9		Consumption of home grown produce	HH		MEDIUM	LOW LIKELIHOOD	MODERATE/LOW RISK	
10		Ingress into water supply pipework and subsequent water ingestion	HH		MEDIUM	LOW LIKELIHOOD	MODERATE/LOW RISK	
11		Migration of vapours to surface; inhalation indoors	HH		MEDIUM	UNLIKELY	LOW RISK	Based on the known land use history and the scale of the on-Site storage activities, an appreciable source of volatile contamination is considered to be unlikely.
12		Migration of vapours to surface; inhalation outdoors	HH		MEDIUM	UNLIKELY	LOW RISK	
13		Building materials in direct contact with aggressive ground	PROP	Future Site buildings	MILD	UNLIKELY	VERY LOW RISK	Aggressive ground conditions are not anticipated to be present.
14		Dissolution into pore water/shallow groundwater and subsequent migration	CW	Bagshot Formation (a Secondary (A) Aquifer)	MEDIUM	UNLIKELY	LOW RISK	Whilst the potential presence of some localised organic contamination at the Site could potentially impact the groundwater quality in the underlying bedrock aquifer, given the nature and scale of the known land use activities, an appreciable source of soluble contamination is considered to be unlikely. It is noted that there are no potable water abstractions or SPZs within the local area.
15		Dissolution into pore water/shallow groundwater and subsequent migration	CW	Drainage ditch (c. 220 m north-east)	MILD	UNLIKELY	VERY LOW RISK	The risk classifications reflect the reasonable distance to the nearest surface water feature, as well as its anticipated modest sensitivity.
16		Dissolution into aqueous phase and preferential migration via drainage structures	CW		MILD	UNLIKELY	VERY LOW RISK	

2.5 Preliminary Risk Assessment

Nr	Sources	Pathways	TYPE	Receptors	Consequence	Probability	Risk classification	Comments
17	Potential for asbestos containing materials within the subsurface soils	Liberation of sub surface ACMs and inhalation of asbestos fibres	HH	Future Site occupants	MEDIUM	LOW LIKELIHOOD	MODERATE/LOW RISK	Given the presence of miscellaneous waste materials on-Site it is possible that some ACMs may be locally present in the subsurface soils.
18	Potential for dissolved phase contaminants to be present within shallow groundwater	Lateral and vertical groundwater movement via natural or artificial flow paths	CW	Bagshot Formation (a Secondary (A) Aquifer)	MEDIUM	UNLIKELY	LOW RISK	Given the nature and scale of the known land use activities, an appreciable source of dissolved phase contamination is considered to be unlikely. It is noted that there are no potable water abstractions or SPZs within the local area.
19		Lateral and vertical groundwater movement via natural or artificial flow paths	CW	Drainage ditch (c. 220 m north-east)	MILD	UNLIKELY	VERY LOW RISK	The risk classification reflects the reasonable distance to the nearest surface water feature, as well as its anticipated modest sensitivity.
20	Potential for elevated methane to be present within the sub-surface soils	Lateral and vertical migration into on-Site buildings; potential to cause an explosion	HH	On-Site properties and their occupants	SEVERE	NEGLIGIBLE	NO DISCERNABLE RISK	The gas generation potential of on-Site materials is considered to be limited.
21		Lateral migration towards off-Site buildings; potential to cause an explosion	HH	Off-Site properties and their occupants	SEVERE	NEGLIGIBLE	NO DISCERNABLE RISK	
22	Potential for elevated carbon dioxide to be present within the subsurface soils	Lateral and vertical migration into on-Site buildings; potential to cause asphyxiation	HH	Occupants of on-Site buildings	SEVERE	NEGLIGIBLE	NO DISCERNABLE RISK	
23		Lateral migration towards off-Site buildings; potential to cause asphyxiation	HH	Occupants of off-Site buildings	SEVERE	NEGLIGIBLE	NO DISCERNABLE RISK	
24	Potential for radon within the subsurface	Lateral migration towards on-Site buildings; potential to cause long term health effects	HH	Occupants of on-Site buildings	MEDIUM	UNLIKELY	LOW RISK	The Site lies in an area where <1% of homes are at or above the UK radon action level (200 Bq/m3).
	OVERALL RISK RATING (<i>on-Site sources</i>)						LOW to MODERATE/LOW RISK	

2.5 Preliminary Risk Assessment

Nr	Sources	Pathways	TYPE	Receptors	Consequence	Probability	Risk classification	Comments
Off-Site sources - Agricultural farm buildings, adjacent to the western Site boundary (1968 to present)								
25	Potential for both inorganic and volatile organic contaminants to be present within the subsurface soils	Dermal contact, ingestion & inhalation of soils & soil dust	III	Future Site occupants	MEDIUM	UNLIKELY	LOW RISK	Given that farm buildings have historically been located adjacent to or within c. 20 to 30 m of the Site, there is the potential for some localised ground contamination; however, it is considered unlikely that significant contamination will have migrated onto the Site itself.
26		Consumption of home grown produce	III		MEDIUM	UNLIKELY	LOW RISK	
27		Ingress into water supply pipework and subsequent water ingestion	III		MEDIUM	UNLIKELY	LOW RISK	
28		Migration of vapours to surface; inhalation indoors	III		MEDIUM	UNLIKELY	LOW RISK	
29		Migration of vapours to surface; inhalation outdoors	III		MEDIUM	UNLIKELY	LOW RISK	
Off-Site sources - Plant nursery, c. 70 to 100 m east (1968 to 1989)								
30	Potential for both inorganic and volatile organic contaminants to be present within the subsurface soils	Dermal contact, ingestion & inhalation of soils & soil dust	III	Future Site occupants	MEDIUM	UNLIKELY	LOW RISK	Whilst it is possible that the former plant nursery was associated with some miscellaneous contamination, this is considered unlikely to have migrated onto the Site, due to the reasonable distance between the nursery and the Site. It is noted that the nursey was disbanded at least 35 years ago.
31		Consumption of home grown produce	III		MEDIUM	UNLIKELY	LOW RISK	
32		Ingress into water supply pipework and subsequent water ingestion	III		MEDIUM	UNLIKELY	LOW RISK	
33		Migration of vapours to surface; inhalation indoors	III		MEDIUM	UNLIKELY	LOW RISK	
34		Migration of vapours to surface; inhalation outdoors	III		MEDIUM	UNLIKELY	LOW RISK	
	OVERALL RISK RATING (<i>off-Site sources</i>)						LOW RISK	

2.6 Next Steps

	Proportionate Phase 2 intrusive investigation following Site clearance		Given the nature of the known land use activities at the Site and therefore the potential for some localised ground contamination to be present, it is recommended that a proportionate programme of site investigation works be undertaken in order to establish the presence or absence of contamination and to enable a quantitative assessment of the associated environmental risks. In order to enable more representative soil sampling it is recommended that the site investigation be performed following the clearance of all existing Site structures and associated vehicles / miscellaneous wastes (including any bonfire residues). Further advice: Please contact info@geosmartinfo.co.uk for further information regarding the need for a Phase 2 investigation. For information on reputable site investigation companies, enquiries can be made directly to your local authority or via www.endsdirectory.com

3. Supporting Information

The following supporting information is contained in this section:

Section	Content
3.1	Referenced materials used in the EnviroSmart reporting
3.2	Site photographs
3.3	Published environmental data records (Landmark Envirocheck report 22a and 22b Barkham Ride, Finchampstead, Wokingham, RG40 4EU. REF: 361969528_1_1) including: • Aerial photographs and site map • Environmental permits, incidents and registers • Landfill and other waste sites • Current land use information • Geology • Hydrogeology and hydrology • Flooding • Designated environmentally sensitive sites • Other environmental factors
3.4	Risk assessment methodology
3.5	Historical land use maps

Disclaimer

This report has been prepared by GeoSmart in its professional capacity as soil and water specialists, with reasonable skill, care and diligence within the agreed scope and terms of contract and taking account of the manpower and resources devoted to it by agreement with its client, and is provided by GeoSmart solely for the internal use of its client.

The advice and opinions in this report should be read and relied on only in the context of the report as a whole, taking account of the terms of reference agreed with the client. The findings are based on the information made available to GeoSmart at the date of the report (and will have been assumed to be correct) and on current UK standards, codes, technology and practices as at that time. They do not purport to include any manner of legal advice or opinion. New information or changes in conditions and regulatory requirements may occur in future, which will change the conclusions presented here.

This report is confidential to the client. The client may submit the report to regulatory bodies, where appropriate. Should the client wish to release this report to any other third party for that party's reliance, GeoSmart may, by prior written agreement, agree to such release, provided that it is acknowledged that GeoSmart accepts no responsibility of any nature to any third party to whom this report or any part thereof is made known. GeoSmart accepts no responsibility for any loss or damage incurred as a result, and the third party does not acquire any rights whatsoever, contractual or otherwise, against GeoSmart except as expressly agreed with GeoSmart in writing.

Important consumer protection information

This search has been produced by GeoSmart Information Limited, Suite 1, 1 Bellstone Court, Bellstone, Shrewsbury, SY1 1JB.

Tel: 01743 298100

Email: info@geosmartinfo.co.uk

GeoSmart Information Ltd is registered with the Property Codes Compliance Board (PCCB) as a subscriber to the Search Code. The PCCB independently monitors how registered search firms maintain compliance with the Code.

The Search Code

- provides protection for homebuyers, sellers, estate agents, conveyancers and mortgage lenders who rely on the information included in property search reports undertaken by subscribers on residential and commercial property within the United Kingdom
- sets out minimum standards which firms compiling and selling search reports have to meet
- promotes the best practice and quality standards within the industry for the benefit of consumers and property professionals
- enables consumers and property professionals to have confidence in firms which subscribe to the code, their products and services.

By giving you this information, the search firm is confirming that they keep to the principles of the Code. This provides important protection for you.

The Code's core principles

Firms which subscribe to the Search Code will:

- display the Search Code logo prominently on their search reports
- act with integrity and carry out work with due skill, care and diligence
- at all times maintain adequate and appropriate insurance to protect consumers
- conduct business in an honest, fair and professional manner
- handle complaints speedily and fairly
- ensure that products and services comply with industry registration rules and standards and relevant laws
- monitor their compliance with the Code

Complaints

If you have a query or complaint about your search, you should raise it directly with the search firm, and if appropriate ask for any complaint to be considered under their formal internal complaints procedure. If you remain dissatisfied with the firm's final response, after your complaint has been formally considered, or if the firm has exceeded the response timescales, you may refer your complaint for consideration under The Property Ombudsman scheme (TPOs). The Ombudsman can award up to £5,000 to you if the Ombudsman finds that you have suffered actual financial loss and/or aggravation, distress or inconvenience as a result of your search provider failing to keep to the Code.

Please note that all queries or complaints regarding your search should be directed to your search provider in the first instance, not to TPOs or to the PCCB.

TPOs contact details:

The Property Ombudsman scheme

Milford House

43-55 Milford Street

Salisbury

Wiltshire SP1 2BP

Tel: 01722 333306

Fax: 01722 332296

Email: admin@tpos.co.uk

You can get more information about the PCCB from www.propertycodes.org.uk

Please ask your search provider if you would like a copy of the search code

Complaints procedure

GeoSmart Information Limited is registered with the Property Codes Compliance Board as a subscriber to the Search Code. A key commitment under the Code is that firms will handle any complaints both speedily and fairly. If you want to make a complaint, we will:

- Acknowledge it within 5 working days of receipt.
- Normally deal with it fully and provide a final response, in writing, within 20 working days of receipt.
- Keep you informed by letter, telephone or e-mail, as you prefer, if we need more time.
- Provide a final response, in writing, at the latest within 40 working days of receipt.
- Liaise, at your request, with anyone acting formally on your behalf.

If you are not satisfied with our final response, or if we exceed the response timescales, you may refer the complaint to The Property Ombudsman scheme (TPOs): Tel: 01722 333306, E-mail: admin@tpos.co.uk.

We will co-operate fully with the Ombudsman during an investigation and comply with his final decision. Complaints should be sent to:

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Ove Arup Copyright Notice

The Mining Instability data was obtained on licence from Ove Arup & Partners Limited (for further information, contact mining.review@arup.com). No reproduction or further use of such Data is to be made without the prior written consent of Ove Arup & Partners Limited. The supplied Mining Instability data is derived from publicly available records and other third party sources and neither Ove Arup & Partners nor Landmark warrant the accuracy or completeness of such information or data.

Stantec Copyright Notice

The cavity data presented has been extracted from the PBA (now Stantec UK Ltd) enhanced version of the original DEFRA national cavity databases. Stantec UK Ltd retain the copyright & intellectual property rights in the data. Whilst all reasonable efforts are made to check that the information contained in the cavity databases is accurate we do not warrant that the data is complete or error free. The information is based upon our own researches and those collated from a number of external sources and is continually being augmented and updated by Stantec UK Ltd. In no event shall Stantec UK Ltd or Landmark be liable for any loss or damage including, without limitation, indirect or consequential loss or damage arising from the use of this data.

Radon Potential dataset Copyright Notice

Information supplied from a joint dataset compiled by The British Geological Survey and Public Health England. The probability result is only valid for properties above ground. All basement and cellar areas are considered to be at additional risk from high radon levels. If an underground room such as a cellar or basement makes up part of the living or working accommodation, the property should be tested regardless of Radon Affected Area status.
