COMMENTS:

I fully support the planning application of this new cabin which will directly positively impact the children that attend this setting. It will assist with the pre-school age children to get up to speed on how EYFS may be for them so when they move to their primary school this will be less daunting and they will have a high rate of success. There is more than adequate space for this cabin and any further plans due to the nature of the location. This will also allow the children to have an outside play space to themselves also - which is imperative to their continued learning and social skills.

I fully support this application.
