COMMENTS:

I am objecting to the proposed development on the following grounds:

The urbanisation of the countryside.

An inevitable increase in the volume of traffic on single track roads that would create road safety problems.

Throughout the winter months the roads surrounding the site have been frequently closed due to severe flooding resulting in a consistently high water table, this means that the flooding takes much longer to disperse on each occasion.

The site is outside of the settlement boundary[CP2 and TB10]`
