COMMENTS:

I object on the basis of being inappropriate development in a countryside location and placing further excessive burden on the congested Langley Common Road and Barkham Road. I have always reported to the council on numerous occasions that the roads, and the speed limits are safe for the further traffic. There are sufficient large sites to fill quotas without the need to fill all gaps and smaller plots with so many more properties. Note council has already almost approved a development up the road. If this traffic is to exit onto Langley Common Road, that is possibly a further ~40 (many houses have more than one car) cars. This road is not equipped.
