COMMENTS:

I object to the proposed development of this site. It would negatively impact the local wildlife, taking away the green space that provides a border between villages and a habitat for many different species. The volume of traffic on an already busy road (Longwater Lane) would increase, as would the demand on local services. There is no longer a shop or petrol station in Finchampstead village to cater for more residents. I think it would have a detrimental affect on the existing neighbouring properties, adding noise and light pollution.
