COMMENTS:

I would ask you to check the planning granted on sapphire centre . recently new building.

The planning on this building was granted and required the car park as part of the usage of this building. The new plan that has been submitted to join the sapphire centre to the Codan building means that the apacor building no longer has the car park. On a day to day basis the apacor car park is full of cars. The car park in the codan building which is being reduced by the new building would not hold enough cars for the excisting apacor staff let alone the new staff when the codan building is finished . The owners of apacor have said that no deliveries, trucks etc will come down the road to the rear of the building. we put up with this for a year with the apacor new building . we dont want to go through this again.
