COMMENTS:

Whilst acknowledging the benefits of an air source heat pump for the owner, the ASHP unit will impact upon our peaceful enjoyment of our garden given the proposed location. The proposed area placement adjoins the rear of three neighbouring properties and is in proximity to regularly occupied living areas within the home. The popular Waltham Chase development is a quiet suburb where the ambient noise level is considered low. The potential noise level between 40 and 60 decibels will adversely impact us and those nearby.
