Although I appreciate the need to increase the number of apartments at this location, to improve the financial viability, I deplore the need to demolish the existing lounge. The lounge is unique architecturally. It has superb daylight. It has a view to the river and the afternoon and evening sun and easy access to the garden. It is well adapted with excellent acoustics for meetings, television and music. All the residents love this room. To demolish it would be sacrilege. [Close](#)
