COMMENTS:

The charvil lakes are a beautiful local area of wildlife which is enjoyed by many locals to get out in the fresh air and enjoy the countryside. This development will be damaging to the local environment and nature with the chemicals pollution. This is really worrying and will affect thousands of people. Also 59 large vehicles needing to enter everyday is already causing chaos on the road by the large vehicles waiting on the road outside where it is not easy for passing cars to see its clear to overtake. It is likely to cause accidents.
