COMMENTS:

I object to the application on the grounds that this development will negatively impact the visual impact of the area as this is currently a vibrant natural habitat for an abundance of various wildlife. I believe this will also degrade the character of the neighbourhood as the impact of an additional 40 houses is a significant increase to the area, and therefore traffic on what are quiet country roads, increasing noise and disturbance near a primary school. Also the increased demands on local amenities will be further stretched.
