Proposed works to trees covered by TPO 141/1977

- T1 Ash: This is a repeat of the works carried out by us in 2020.
- Reduce all round by 1.5m to the nearest suitable growth point, leaving a flowing canopy line.
 - This tree has a significant cavity at the stem base. These works are to maintain its sail area reducing forces on the weaker parts of the tree. Reducing its height from approximately 16m to 14.5m and its radial spread from approximately 6m to 4.5m.

Showing proposed reduction line.
