COMMENTS:

There is not enough car parking spaces as the place only has 6 which will cause problems for the community who actually live in and around the area. We should not be trying people's livelihood by making where they live more difficult in these try times.

- parking will not be sufficient - prime example is what has happened on London Rd with the parking problems
- the extra pollution this will cause in the area
- increase traffic congestion for all including people who actually live in the area especially opposite.
- increased noise levels for nearby residents
- disturbance to residents due to ongoing activities and congestion
- failure to comply with planning policies sanitation
