COMMENTS:

I support this application as it will address a need in the society and foster a better sense of community. Muslim places of worship encourage all sections of the community to visit and do organise events that are suitable for all.

I support this application as it will offer a place of worship for local muslims. The venue will be accessible to all members of the community thereby further improving community relations. Having a local place of worship is also good for the environment as it will reduce long car journeys. There is a precedence in having places of worship of all faiths in the area. I refer for example to application number 231077 that was approved on 1 August 2023.
