

WOKINGHAM
BOROUGH COUNCIL

Informal Hearing
Statement by Local Planning Authority

Appellant:	Durio Limited
Site:	Park Place Stables, Remenham Hill, Henley-on-Thames, Berkshire, RG9 3HN
Local Planning Authority Reference:	182524
Planning Inspectorate Reference:	APP/X0360/W/19/3224329

also impact on the assessment to be made by the Planning Inspector, particularly during the site visit. It is therefore relevant to detail some of the non-compliance, against which enforcement action is being considered:

Buildings and Structures

- o This appeal for stables and an arena is now partly retrospective; the stables applied for are on site, albeit in a smaller form and in two locations, the larger being in the proposed location
- o Intensification of use of the existing American barn, which was approved for the stabling of six horses under PA ref F/2014/1637, the remainder to be used for associated storage. The barn now stables approximately 16 horses, with no space remaining for associated storage, as shown in Appendix 11
- o Non-compliance with drawings for the polo training arena, resulting in it being more above-ground than approved
- o Retention of a show jumping arena granted a temporary permission expiring on 31st March 2015
- o Sewage treatment plant partly above ground and fenced in, to the east of the existing American barn stables
- o Open-roofed storage area to the north of the existing American barn stables, housing building materials
- o Shed by the irrigation pond
- o Marquee framework bolted to the ground, therefore having a degree of permanence, appearing to be a wash-down area for horses to the north of the polo arena
- o Two existing agricultural sheds and a third shed under construction to the east of the polo arena
- o Seven portakabins to the south of the polo arena
- o Gallops fencing – expressly stated as not required in the relevant permission (LPA ref 162288)
- o Pavilion design and location not as approved; proposed without windows in the roof and as a traditional structure in cedar shingles and oak cladding, to be left untreated to silver naturally over time
