COMMENTS:

I am writing as the plans do not show if the extension will extend into the metre gap which currently exists between the garage of 7 Bythorn close and the side wall of my mothers bungalow at 6 Bythorn Close. I believe this gap should be maintained as it is could be important for access to her wall in case of maintenance and utility supplies. Also currently access is granted to the side gap (which has been turned into an outbuilding by the previous owner) by a cut out in my mums lawn close to the garage and a concrete slab. If the front of the garage was extended forward there would be no access to the side from the front without walking across my mums lawn. Although you could still access it from the back garden. I do not wish to object to the plans but want to ensure that a proper metre gap exists between the two properties.
