COMMENTS:

I support this application because:

It enhances the existing property which will overall be good for the surrounding neighbourhood.

The design provides additional flexible living space by making good use of redundant outbuilding space and incorporates it into the existing footprint of the house.

This is a similar type extension to a number of other properties in the Starmead area and therefore in keeping with the style and feel of the houses in the area.

It provides an accessible downstairs bathroom without having to navigate stairs, which removes one of the downsides with these properties if you have young children.
