COMMENTS:

As a resident at this address, I would like to respectfully request that the council review the postcodes and addresses associated with the recent comments regarding the fence. It appears that some of the submissions may not correspond to valid or existing addresses, which raises concerns about the authenticity of the feedback being provided.

It is possible that some of the negative comments particularly those making unfounded claims about obstructions may be coming from the same individual or a small group of individuals repeatedly submitting under different names. This pattern suggests that the issue may be less about genuine concern and more about personal dissatisfaction with changes on the road, or possibly even motivated by resentment or opposition to the improvements made.

For the record, the fence in question does not obstruct visibility or pose any safety hazard. It has been placed appropriately and does not impact drivers, pedestrians, or neighbours.

Thank you for taking the time to consider this and for ensuring that community feedback is both fair and factual.
