COMMENTS:

My objects stay the same as my previous one, reducing the roof height by just 90 centimetres is a joke. This is still not within the keeping of the street which is all BUNGALOWS, also it does not resolve the issue with parking, even the council said it doesn't have enough room for four cars never mind the potential of up to ten cars, I know from my own drive I can only fit three cars on it as my property is the same size, parking on the street is bad enough and dangerous enough as it is.
