COMMENTS:

My wife and I object to this proposal to vary condition 32 and lift the restrictions to delivery times. We are concerned for the safety of children crossing the road as it is used by many as a walk through from the housing estate to the park. We are concerned for the noise and air pollution to the park and field areas behind the buildings including the wildlife. We are concerned for the noise levels at night time for residents with more traffic coming through. During the construction so far, there has been a nightmare with parking for local residents due to the workers parking on our streets, so if it is being used at night time as well, parking will continue to be an issue for those who live here. We also have videos of the amount of litter being left on the pavements and grass from those working there and this will be more of a problem if there are people coming by 24 hours a day.
