COMMENTS:

Along with the majority of local residents we strongly object to this proposal. There are no mentionable benefits to this planned development for the local village inhabitants & businesses. All a development like this will bring is more traffic disruption to an already over stretched highways infrastructure, more pollution, destruction of green areas impacting local wildlife. Yet again planning submitted by people that don't even live locally and won't care about any impact on our local area as it's not on their doorstep!!
