- **Woodland** - A Woodland TPO protects all trees within the defined area, including natural regeneration - seedlings and saplings i.e. trees less than 3.5m in height are not excluded. The woodland category's purpose is to safeguard a woodland as a whole. So it follows that, while some trees may lack individual merit, all trees within a woodland that merits protection are protected and made subject to the same provisions and exemptions. In addition, trees and saplings which grow naturally or are planted within the woodland area after the Order is made are also protected by the Order.

Find a tree:

- [View a Tree Preservation Order document \(PDF\):](#)

- To view a Tree Preservation Order document (PDF) left-click "View" next to TPO Document within the pop-up.
