COMMENTS:

This area was sold to us with a rural background and easy commute to town . However the development seems not to stop with Phase5. If this planning goes ahead it would be chaotic in terms of Infrastructure especially Roads , schools and Liesure centers. Green areas are

totally disappearing. There is no initial plan on how this new community would integrate into the area without proper infrastructure. Over and above the SANG charges are a lifetime which the buyer has to pay with no real development and look after of the Development. The council should find another area as this development is already overloaded.
