COMMENTS:

1. Trees cutting down

I am writing to protest against the upcoming industrial development at Shire Hall, and to express my concern about the negative impact this proposal will have on the neighbouring community.

Proposed plans will result in a devastating destruction of the local woodland, thus disrupting the biodiversity of the area. In a world where global deforestation is becoming an increasingly prominent issue, eliminating the mature woodlands in our neighbourhood that is home to multiple species of wildlife and a natural barrier from both noise and air pollution can only worsen our already declining environmental situation.

2. Increased traffic

In addition, the proposed development will evoke many safety concerns about traffic congestion and the disturbance this will cause. The local area will become more risky for drivers and pedestrians, both young and old, as this development is proposing for increased traffic for all hours of the day and thereby adding to the congestion.

Thank you for taking my concerns into account, I hope you will re-consider this plan.
