COMMENTS:

There is insufficient infrastructure and local resources to support this proposal. The traffic through the village is already grid locked leading to the m4 and A329 in the mornings. There aren't enough local school places, GPs or dentists for the current number of houses let alone more. There is already a large development and this being built on what is currently a reasonably attractive entrance to Shinfield Meadows could negatively impact desirability and house prices in the area. The development is just about finished and this would mean going back to square one of living on a building site with associated noise, dust in the air etc. Most importantly the wildlife would be negatively affected on all levels. This application should be refused.
