COMMENTS:

I object for a no of reasons.

The area is a buffer between finchampstead and eversley. Loss of this will blend the boundaries

The site is in the countryside and outside the settlement boundary as per the WBC local plan

Finchampstead has had significant recent housing built - in far more sustainable and accessible locations (gorse ride, arborfield)

There is no public transport so cars will be needed for all journeys. There are few pavements and no cycle paths in the area to access

facilities

The area borders areas recently developed to support wildlife. 40 new extra houses will be damaging to this

Thanks
