COMMENTS:

I am concerned about the development's impact on the wildlife, particularly the birds. Birdguides note the importance of the areas west of Moor Green Lakes for e.g. waders and winter gulls. Also of concern is the wellbeing of small mammal species, and badgers, in this area, as suitable habitats for such are increasingly rare. With all the work that has gone into creating the nature reserve it is sad to see the wildlife threatened not only by the loss of land but the disruption brought by the construction, ongoing pollution (chemical, light, sound) at ever closer proximity and the increased danger that accompanies more roads and traffic as the village continues to spill further beyond its boundaries.
