COMMENTS:

Dear Planning team,

The proposed garage extension takes away sunlight in our garden and will add shade as well.

And from proposed house side extension, adding two windows and slide doors towards our rear garden will mean that they can see into our living room, study and kitchen.

Another important factor to consider is, their house is on a higher level than ours by 1.5 metre, if they stand on their proposed Garden room extension, they can see into our living room, dining room, kitchen and Garden.

If this proposed extension get approved, our ground floor and garden will be fully exposed to neighbours and we will lose privacy and security.

Hence, we strongly object this extension. Thanks
