COMMENTS:

All objections in my previous comment still stand.
This objection is to note that the additional documents added do not materially change anything, serving only to restate many of the contentious arguments in the original application; whilst offering no acknowledgement of the many challenges in my and others' objections.

The one clarification they present is over the DEPZ, implying that should the ongoing appeal process for application 233038 (Land East of Hayes Drive) be decided in favour of the developer then it implies that this application should be viewed favourably. Whatever the final decision on 233038, this application remains unsustainable, contrary to Parish and WBC policies, and without any merit.

I object again to this application.
