DATE SUBMITTED : 05/10/2026

COMMENTS:

The use of gas to power the data centre is unacceptable, this is a fossil fuel and Wokinghams aim to be carbon neutral borough is not consistant with this.

The bakcup system of diesel generators, when deployed, will cause both noise and air pollution.

There are home very close by, just the other side of the railway tracks, these houses with be impacted by the noise and heat created by the Data Centre.

This site is not a conventional brownfield site. It is a wetland area, a nature reserve and home to great deal of wildlife, all of which will be impacted by the heat and noise pollution.
