COMMENTS:

I object on the grounds that changing the usage of the garage from storage / garage to residential changes my property from link detached to semi-detached.

The change to living accommodation using my party wall will have a huge impact on the privacy of my home and family.

Currently the garage acts as a buffer between our houses for noise. My home office is situated next to this wall and I work from home, any noise disruption can potentially affect my livelihood. I am concerned about damage to my property, disruption and inconvenience of work being carried out especially on the party wall

I also dispute that the current plans are accurate as the party wall resides solely within number 8's property line, and not as indicated in the drawings across the property line.

I feel strongly that the ground on which number 10 sits is being over developed in this proposal and urge the council to review the proposal stringently.
