COMMENTS:

We object to the 2 units being placed on the building. The building already blocks our view and has more than likely reduced our value. Number 2 has been on sale for a year already. With 2 units right in view from our garden it will depreciate our value even more. Why can the units not be placed around the side of the building out of our view? In addition there is bound to be additional noise when we are trying to enjoy our garden, again this will affect our ability to sell in the future.
