Shed Shackle - The Only Police-Approved Shed Security Anchor!

Police Approval: The Shed Shackle has been awarded *Police Preferred Specification* status under the [PCPI Secured-by-Design](#) scheme. It is the only Police-approved shed wall anchor on the market.

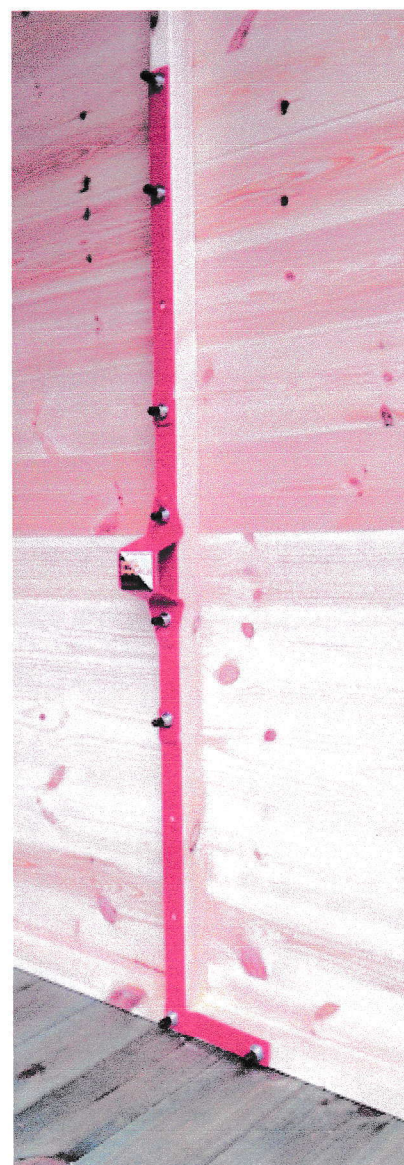

The Pragmasis **Shed Shackle improves security for wooden sheds** and a variant extends the same principle to **metal sheds/bike stores**.

Thefts from sheds have become more and more frequent and the options for improving your shed security have been either expensive, impractical, or both. Until now!

The Shed Shackle reinforces a large area of the wall of the shed so that a thief would have to saw or smash a huge section, making a lot of noise and taking a lot of time. (And even then, this would leave a large metal/wooden contraption still secured to your bicycle/etc!)

Unlike a conventional ground anchor, the Shed Shackle doesn't require a heavy concrete floor to the shed and actually *improves* the strength of the shed wall - your shed becomes *steel reinforced*!

Customer Comment: "You might like to know that we **recently had our shed broken into with one bike stolen**. However, the **two bikes we had secured to the Shed Shackle were not touched!!** So we have been asked by our residents to order another!! We all think the Shed Shackle is fab!!"

If you have high value items in need of protection, a good concrete floor with a [Torc Ground Anchor](#) may give you better security, at a higher price, but if a 100mm+ thickness concrete floor is unrealistic or if a floor-
