COMMENTS:

I do not object to the desire to have a place of worship, but just not in this location.

The proposed space is a business unit which I believe only has 14 parking spaces. The proposal for use of public transport is dangerous as would encounter crossing a busy road and could be a safety issue. The additional noise issues caused by celebrations, prayers could have an impact on the businesses already in situ. The extra congestion caused by possible parking illegally due to the shortage of parking, could cause a public safety issue. The cars would then spill into the other businesses stopping customers from entering these businesses due to lack of available parking.

Therefore affecting commercial activity for Wickes, Halfords and pets at home. The road into this facility is often at gridlock at any hour, with this place of worship there, this will add to the congestion and can again be a hazard and safety concern.

I believe that there is a more suitable location for this place of worship and just not at the proposed place.
