COMMENTS:

I feel the planned site will not support a place of worship and, therefore, object.

There is limited parking for business and would not support a mass influx of people. I note similar issues for another religious site around Earley (not enough parking, so parking is usually where this is not permitted e.g on the roundabout under the A329). Potentially, local resident dwelling are likely to be impacted with inconsiderate parking. The build up of traffic on the main routes, mainly the Reading Road would be a problem on an already densely populated main route.

Noise pollution is another concern with prayers often starting extremely early and late at night.

Whilst I appreciate these centres are important for our communities, I personally feel a more appropriate setting should be considered.
