COMMENTS:

You cannot object to building a much needed Aldi on this site based on it impact to the floodplain and then continue to build other projects at the same site!

Please reject this application as you did for the Aldi until you install better flood defence systems.

The Aldi had my support albeit with the same reservations as it served a wide area with a needed alternative shop. This proposal serves a much smaller community and has all the same environmental impact issues. I cannot offer my support even to this building.

Both buildings are needed however you must address the issues with flooding before building on this site. With the development of Hatch Farm in the near future flooding will become a real concern for the residents of Winnersh. Please I implore you not to be so short sighted as to progress with this!
