COMMENTS:

I am very concerned about the potential environmental risks, public safety concerns and extra heavy vehicles that this development would bring. This area backs onto a country park which includes several lakes and habitats for many wildlife. It regularly floods and a fuel spill into the water could be catastrophic.

This is already a busy road with a nasty bend which has seen several accidents in the time I've lived in the area. There are many pedestrians and cyclists using the narrow paths and I believe large turning fuel tankers would be incredibly dangerous. I also worry about the risks of such large volumes of fuel being stored in a residential area.

This is a quiet, peaceful village which is not an appropriate place at all for this development. Please do not grant planning permission for this depot.
