COMMENTS:

I use this area for horse riding. I am very concerned that these plans do not show what they need to show regarding bridleways. For example some of the current bridleways seem to be shown as walking and cycleways on your plans. I ride on many of the byways these need to stay rural so that cars do not start to use them- could they be down graded to Restricted Byways so cars cannot use them. The historic lanes have been recommended by WBC to become bridleways but I cannot see this marked on your plans. The British Horse Society are very keen to keep bridleways open and improve access for horse riders, I am sure they would help you with this if you contacted them.
