Good afternoon

Request for a Non-Material Amendment to Planning Permission 230072

We were granted Planning Permission to install Heat Pumps at the Church under reference 230072 on 13 June 2023, but with conditions regarding noise output.

We have since re-engineered the project and are now in a position to meet these noise requirements. However, this includes the use of acoustic boxes, but because of the additional weight now requires a small change in location.

I have included the acoustic engineers final report together with the revised plans to show the layout of the revised installation and a “mock-up” image to give an idea of the finished appearance from Chapel Row.

We now request unconditional planning permission to proceed with this project.

Thank you.

Terence Powley
Treasurer, Twyford URC and Church Trustee.
