COMMENTS:

We received an email from WBC Planning Team on 29th Jan 2026 advising that additional plans have been put on the Portal. On review of the additional plans its clear that they do not address any of the key concerns raised by myself and several hundred other people that disagree with the use of the Farm Track as the access road, again not addressing the safety, environmental, traffic congestion and many other concerns raised or why access onto the Distributor Road is not being proposed or considered.

Therefore all previous objections remain in place.

There appears to be a fundamental failing on the part of WBC Planning Team that it refuses to even investigate the alternative routes for access to the site.
