

Oak – Tree 1

Oak (Tree 1) - Rear garden, rear boundary - Reduce in height by approximately 6 metres. Lateral spread is to be reduced by approximately 3 metres as required to shape and balance crown. All branches are to be reduced to suitably strong growth points where possible in order to retain a natural appearance. Major deadwood is to be removed from entire crown area

Cobra Bracing - Install 1 x section of Cobra Bracing at approximately 10 metres from ground level in order to support lateral movement of both main stems

Reason for application: Due to reactive growth creating a large swelling around main union at approximately 1 metre from ground level as shown in attached photograph
